

POKHARA UNIVERSITY

Level: Bachelor
Programme: BE
Course: Web Technology

Semester: Fall

Year : 2022
Full Marks: 100
Pass Marks: 45
Time : 3hrs.

Candidates are required to give their answers in their own words as far as practicable.

The figures in the margin indicate full marks.

Attempt all the questions.

1. a) Let us assume a scenario, where person 'A' send an email to person 'B' and person 'B' response to person 'A'. Now, explain the sending and receiving process of email. 8
- b) What happens if you enter <https://pu.edu.np> into your browser? Describe the procedures behind the screens. Describe along with its block diagram. 7
2. a) Write HTML tags to generate the following design: 8

Labels	Input Fields
Full Name	
Gender	☒ Male ☐ Female ☐ Others
Email	
Address	
Choose Color	<input type="color"/>
Upload Profile Picture	Choose file No file chosen
Register	

- b) Explain Standard HTML document Structure. Why table-less design is preferred more than table-based design? How grouping of elements is possible in HTML? 7
3. a) What are overriding rules in 'css'? List out different types of css selectors. Explain box model in css with suitable figure. 7
- b) Write any 2 syntactic characteristics of JavaScript. Explain about different element access methods in JavaScript. 8
4. a) Why JavaScript is called dynamically typed Language? Explain with example how variables are declared in JavaScript. 5

- b) Why JavaScript is called loosely typed Language? Explain with example how type conversion takes place in JavaScript. 5
- c) Write a JavaScript program to input principal, time, and rate using prompt and display the calculated Simple Interest using alert. 5
5. a) Write PHP inbuilt function to perform the following operations: 7

```
$list = [2, 6, 10, 8, 4, 7]
$lang = ["PHP" "JS", "C", "CPP"]
$days = [Mon"=>2, "Tue"=>3, "Wed"=>4 "Thu"=>5];
```

 - i. Delete an individual element (8) from \$list array.
 - ii. Assess last element from \$lang array.
 - iii. Extract values from \$days array.
 - iv. Extract keys from \$days array.
 - v. Access third element from \$list array.
 - vi. Sort \$list in ascending order.
 - vii. Check if value (20) exists in \$list array.
- b) What are sessions and cookies? Mention any 5 differences between them with an example. An example must include all the functions of the session and cookies. 8
6. a) Develop a login form that includes Username and Password (Username= "admin" Password= "admin" already present in your database). Write a PHP and MYSQL code, first to verify log-in credentials. Second, when login is successful it navigates to the form that includes Name, Email, Phone, Password, and confirm Password. When you fill out the form it should display the information in the table structure. (Show database connection and assume database name and table name yourself) 8
- b) Explain the use of PHP \$_COOKIES, \$_SESSION. How to write content in a particular file using PHP? 7
7. Write short notes on: (Any two) 2×5
 - a) Math Function in PHP (any 4)
 - b) Level of Style Sheets
 - c) DOM tree
